

EE401 EARLY ENTRY BLADES

PROFESSIONAL SERIES BLADES

SUPREME EARLY ENTRY BLADES

The **EE401 Series** is a professional-grade early entry diamond blade engineered for cutting **green concrete with medium hard aggregate**. Designed for low-horsepower early entry saws, the EE401 provides clean, accurate control joints while delivering dependable cutting performance in materials containing granite, slate, traprock, and similar aggregates. Its precision-engineered bond and patterned segment design promote consistent diamond exposure, smooth tracking, and long blade life.

APPLICATION

Green Concrete
Medium Aggregate, Medium Hard River Rock, Traprock,
Decomposed Granite, Medium Crushed Gravel
GREEN

EQUIPMENT

Early entry floor saw
