

EE501 EARLY ENTRY BLADES

PROFESSIONAL SERIES BLADES

SUPREME EARLY ENTRY BLADES

The **EE501 Series** is a professional-grade early entry diamond blade engineered for cutting **green concrete with medium aggregate**. Designed for low-horsepower early entry saws, the EE501 delivers fast, clean control joints while providing excellent cutting performance in concrete containing medium traprock and similar aggregates. Its optimized bond formulation and patterned segment design promote consistent diamond exposure, smooth tracking, and dependable blade life across a wide range of cutting conditions.

APPLICATION

Green Concrete
Medium Soft Aggregate, Pit Gravel, Limestone, Dolomite
GREEN

EQUIPMENT

Early entry floor saw
