

MC100 PREMIUM BLADES

CONSTRUCTION SERIES BLADE

METAL CHOP SAW BLADE

The **MC100 Metal Chop Saw Blade** is engineered for fast, efficient cutting of mild steel, rebar, angle iron, structural steel, tubing, and other ferrous metals. Manufactured with **brazed single layer diamond (BSL) premium diamond segments** and a precision-balanced steel core, the MC100 delivers cooler operation, longer service life, and cleaner cuts than conventional abrasive wheels. **Featuring a 5 mm (.196") segment height**, it provides consistent cutting performance and excellent durability for professional fabrication, construction, and industrial applications while reducing downtime caused by frequent abrasive wheel changes.

APPLICATION

Metal studs, Re-bar, Angle and structural steel and Non-ferrous materials

EQUIPMENT

Chop saw only

TECHNICAL SPECIFICATIONS

SEGMENT HEIGHT	5 mm (.196")	PERFORMANCE LEVEL	Premium
CONFIGURATION	Segmented with cooling holes	ARBOR	1"
ASSEMBLY	Brazed single layer diamond (BSL)	COOLANT	Dry / Wet

AVAILABLE SIZES

DIAMETER	AVAILABLE SEGMENT WIDTHS	Arbor
14"	.133"	1"
