

TP100 ECONOMY BLADES

CONSTRUCTION SERIES BLADE

TUCK POINT BLADES

The **TP100 Tuck Point Blade** is engineered for fast, clean routing and repair of mortar joints in brick, block, and masonry construction. Its premium **laser welded diamond segments** provide consistent cutting performance, excellent durability, and long service life in demanding restoration applications. Designed for professional contractors, the TP100 delivers smooth, controlled cutting while efficiently clearing debris from the cutting path for maximum productivity.

APPLICATION

Mortar, Masonry, Concrete

EQUIPMENT

Angle grinder
